NEWS RELEASE

Candente Gold Commences Leach Testwork Program for Processing of Mexico Mine Tailings

Vancouver, British Columbia, May 6th, 2015. Candente Gold Corp. (TSX:CDG) ("**Candente Gold**" or the "**Company**") advises that the Company has commenced leach extraction testwork at McClelland Laboratories, Inc. in Sparks, Nevada for Candente Gold's Mexico Mine Tailings Recovery Operation ("MMTRO") located in El Oro, Mexico.

This testwork program will evaluate the potential for leach extraction of gold and silver from representative samples collected from the Mexico tailings during the 2014 Auger Sampling program. A key aspect of this leach testwork program is that the Mexico tails will be subjected to additional grinding prior to leaching. Testwork completed by previous owners in the 1980's indicated that additional grinding of the tails may significantly improve precious metal recoveries. This testwork will also include additional metallurgical and mineralogical characterization of the Mexico tails, which will assist in optimizing recovery strategy. The leach extraction testwork program currently underway will take approximately five weeks to complete.

Leach extraction technology is one of the most commonly applied technologies globally for gold and silver extraction and recovery.

The Company has decided not to pursue the previously announced processing agreement (see Candente Gold News Release 043 dated February 24, 2015) for gravity recovery of gold and silver from the Mexico tailings. Pilot plant testwork was successful in recovering gold and silver; however, the recoveries were variable and in Management's view not sufficient to justify further pilot plant operation.

In addition, the Company has received Expressions of Interest from groups to finance and/or enter into a joint venture for the MMRTO. The Company is pursuing these interests simultaneously with the leach testwork program.

The Mexico Mine Tailings contain an Inferred Resource* of 1,267,400 Tonnes grading 2.94 Au g/t, 75.12 Ag g/t containing 119,900 ounces of gold and 3,061,200 ounces of silver.

*Note: Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. All figures have been rounded to reflect the accuracy of the estimate. For more information see "National Instrument 43-101 Technical Report on the Inferred Mineral Resource Estimate of the Mexico Mine Tailings" prepared by Nadia Caira, P.Geo. and Allan Reeves, P.Geo., dated August 25, 2014 with an effective date of July 8, 2014 (the "Technical Report") available at www.sedar.com.

Joanne C. Freeze, P.Geo., CEO and Sean I. Waller, P.Eng. are the Qualified Persons as defined by National Instrument 43-101 for the project discussed above. Ms. Freeze and Mr. Waller have reviewed and approved the contents of this release.

About Candente Gold

Candente Gold's flagship asset is El Oro, a district scale gold project encompassing the largest and most prolific high grade gold dominant silver epithermal vein system in Mexico. Modern understanding of epithermal vein systems indicates that several of the El Oro district's veins

hold multi-million ounce discovery potential, particularly below and adjacent to the historic workings of the San Rafael Vein, which was mined to an average depth of only 200 metres.

In addition to the exploration potential at El Oro, Candente Gold has acquired the Mexican Mine Tailings Deposit. The Company's current corporate strategy is to evaluate the potential of the tailings to generate near-term cash flow and then focus on remnant high grade mineralization left behind by historic mining and, in the future, return to exploration concentrating on 31 recently delineated targets for new mineralized veins or zones.

Forward-looking Information

This news release may contain forward-looking information (as such term is defined under Canadian securities laws) including but not limited to information regarding the processing of tailings to generate short-term cash flow, the potential for discovery in the El Oro district and other statements that are not historical facts. While such forward-looking information is expressed by Candente Gold in good faith and believed by Candente Gold to have a reasonable basis, they address future events and conditions and are therefore subject to inherent risks and uncertainties including those set out in Candente Gold's MD&A. Factors that cause the actual results to differ materially from those in forward-looking information include, without limitation, gold prices, results of exploration and development activities, regulatory changes, defects in title, availability of materials and equipment, timeliness of government approvals, potential environmental issues, availability of capital and financing and general economic, market or business conditions. Candente Gold expressly disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws.

On behalf of the Board of Candente Gold Corp.

"Joanne Freeze" P. Geo.

President & CEO
